## EB Series Ball Valve Compact

 Locking Device Installation InstructionsThese instructions apply to the following SSP BALL VALVES

- EB Series 41, 42, and 43

## Compact Kit Contents

Installation
Instructions

Locking Device

The locking device can be used to lock the valve in the open or closed position by placing a padlock through the shackle hole in the locking device. The locking device is designed for use with padlock shackle diameters from $3 / 16$ to $9 / 32$ ( 4.8 to 7.1 mm ).

## Suggested Tools

| Torque wrench with <br> hex adapter <br> (see chart) | Or | Hex key <br> (see chart) | Torque wrench with <br> crows-foot adapter <br> (see chart) | Or |
| :---: | :---: | :---: | :---: | :---: | | Open-end wrench |
| :---: |
| (see chart) |

## Valve Preparation

Note direction of handle prior to removal. Handle must be reinstalled pointing in the same direction. Loosen set screw to remove handle and panel nut.

## WARNING

before removing a valve from the system for service, you must

- Depressurize System
- Cycle The Valve

## WARNING

Residual system media may be left in the valve.

## Installation

Refer to Figure 1 during installation.

1. Place locking plate over valve bonnet as shown.
2. Rotate locking device until protrusions on bottom of the locking device engage with valve body (The shackle hole must be on the handle stop side). Thread on panel nut and tighten to torque value listed in chart.
3. Install handle and tighten setscrew to torque value listed in chart.

Figure 1

| Valve Size | Panel Nut | Handle <br> Set Screw | Panel Nut | Handle Set <br> Screw |
| :---: | :---: | :---: | :---: | :---: |
|  | Open-End <br> Extension | Hex <br> Wrench | Torque <br> in. $\cdot \mathrm{lb}(\mathrm{N} \cdot \mathrm{m})$ | Torque <br> in. $\mathrm{lb}(\mathrm{N} \cdot \mathrm{m})$ |
|  | $3 / 4 \mathrm{in}$. | $5 / 64 \mathrm{in}$. | 50 <br> $(5.7)$ | 30 to 35 <br> $(3.4$ to 4.0$)$ |
| EB43G | $1 \mathrm{in}$. | $3 / 32 \mathrm{in}$. | 150 <br> $(17.0)$ | 30 to 35 <br> $(3.4$ to 4.0$)$ |

WARNING
The locking device must be flush against the valve body.
