

Biography

Paul Omilion

Vice President, Manufacturing Technology Engineering

Paul Omilion is the Vice President of Manufacturing Technology Engineering at SSP. In his current role, Paul is responsible for manufacturing, tool & die, maintenance, manufacturing engineering, and forge operations.

In his 30+ year career at SSP, Paul started as a manufacturing engineer and progressed through various management positions. Paul played a key role in SSP's vertical integration, ISO certification, and the company's lean journey.

Previously Paul was an engineer/supervisor for a tool & die manufacturer, where he earned his tool & die journeyman's certification. Overall, Paul has over 40 years of experience in precision machining. Paul studied Mechanical Engineering at Cleveland State University and Business Management at Kent State University. Paul is a member of numerous professional organizations, (SME, ASM, and FIA).

In his free time, Paul enjoys woodworking, golfing, traveling, and spending time with his family and golden retriever.
