

The Right Way

Tube Bending Safety Training

SSP and our distributors offer hands-on training for selecting, planning, laying out, bending and installing tubing systems.

Our TurnPro Tube Bending Training is a hands-on program designed for technicians and production personnel. It's a great program for anyone who needs to learn the correct way to plan, layout and bend tubing.

Learn how to:

- Select and handle tubing
- Prepare tubing for bending and installation
- Measure and layout tube bending projects
- Make bends up to 90°
- Use the indexing handle to make bends greater 90°
- Make left- and right-reference bends
- Make on-plane and multi-plane bends
- Layout and Install tubing runs for safety and easy maintenance

Working Smart

Safe Tube Fitting Installation Training

SSP and our distributors offer Selection and Installation Training for a variety of fittings.

Upon completion of this training, participants will be able to:

- Identify a variety of tube and pipe fittings
- Install tube and pipe fittings
- Remake fittings when applicable
- Gauge, test and troubleshoot fitting applications
- Use preswaging tools to make tube fitting installation safer and easier
- Use liquid lead detector to find leaks

For more information on training, or to schedule training, please contact our team.
